

SO BORIS...

WHAT WILL YOU DO FOR GREENER TRANSPORT IN LONDON?

I see you are cancelling the new CO₂ Charge, which I supported, and that there will be no £25 rate for the worst gas-guzzlers and no discounts for the cleanest cars in London.

So, what ARE you going to do to reduce CO₂ from transport, improve road safety and reduce air pollution in my city?

Please tell me...

1. What meaningful incentives will you provide for people to choose lower CO₂ cars in London?
2. How will you now raise the money for London's £50 million a year cycling budget?
(The CO₂ Charge was going to provide this money)
3. How will you improve road safety for pedestrians and cyclists, particularly on the school run?
(Road collisions are a bigger danger to young people than gun and knife crime)
4. What will you do to make sure London's air quality meets European legal standards by 2012?
(Many of the most deadly particulates come from private, diesel-powered vehicles)

Yours sincerely,

Name:
